

Rail and Trackwork Supplies™, INC.

MISSION:

Rail and Trackwork Supplies' mission is to produce, in O-Scale, prototypically accurate trackwork components and supplies used on North American railroads.

MANUFACTURING PROCESS:

Our manufacturing process for our cast parts entails the following procedure:

1. Parts are designed in-house using Solidworks 3D modeling software.
2. Wax patterns are printed in-house using our high resolution Solidscape wax printer.
3. Brass masters are investment cast from the wax patterns.
4. Production molds are created from the brass master.
